digicard AUT
Wi-Fi based company card hosting

A stand alone Wi-Fi based company card hosting device

Key Features

- Hosts company card over Wi-Fi
- Simple & reliable connection to vehicles
- Save time, money and PC resource
- Quick and easy to use

Host company card over Wi-Fi

The **digicard-AUT** has been designed to save you the hassle of having a device constantly connected to a PC. This is a Wi-Fi Solution that is setup using the PC and can then be placed as a stand-alone product using a 5-volt power supply.

Simple, fast and reliable

The **digicard-AUT** communicates with any **digicentral** server and waits for connections from vehicles fitted with the **digiDL**. The process is simple, fast and reliable.

Consider the digicard-hotel

For resellers, Tachosys always recommends our **digicard-hotel** which will host 20 company cards through one device. There are however times where it is necessary to host a card within a customer's environment and therefore our **digicard-AUT** is the best tool for the job.
